- 3 Przeczytaj poniższy tekst. Na podstawie informacji w nim zawartych zdecyduj, które z podanych zdań są zgodne z treścią tekstu (T), a które nie (F).

- T F 1 An average British family produces almost 25 kg of rubbish every week.
- T F 2 Each year the Smiths produce half as much rubbish as the year before.
- T F 3 The Smiths couldn't get rid of their rubbish for eight days.
- T F 4 Almost two thirds of the rubbish generated by the family could be recycled.
- T F 5 Since the start of the city campaign, the amount of recycled rubbish has doubled.

- 4 Look at these examples of rubbish from the Smiths' dustbin. Which recycling bank should they be put into?

- |   |                                     |                |
|---|-------------------------------------|----------------|
| 1 | a margarine tub, yoghurt containers |                |
| 2 | magazines, a mail-order catalogue   |                |
| 3 | drink cans, pet food tins           |                |
| 4 | jars, juice bottles                 |                |
| A | aluminium bank                      | C plastic bank |
| B | glass bank                          | D paper bank   |

## How Green Are We?

**M**eeet the Smiths. Like any average British family, they generate 23 kg of rubbish every week. Every year the amount of rubbish they produce grows by 4 per cent.

We asked the family to keep their rubbish for a week in order to find out what they were throwing away. They were shocked when they saw the contents of their weekly rubbish bins on the kitchen table. 'We didn't realise we throw away so much.' When we told them that up to 60 per cent of that rubbish could be recycled, they decided to start doing it immediately.

The town in which they live has started a recycling programme for all the citizens

recently. They can put materials such as paper, cans, bottles and old clothes into special recycling banks in the streets. Since the programme began, the amount of household waste recycled has gone from 7 to 14 per cent.
